

Working Together to Benefit our Community

Building the Right Support / Transforming Care

Building the Right Support is about making sure that families and carers of people with learning disabilities have enough training to help the person they care for to get the right support.

The Building the Right Support programme is also known as the Transforming Care Programme (TCP)

The Building the Right Support programme aims to achieve the following goals:

- ✓ A better community infrastructure resulting in a substantial reduction in the number of people placed in inpatient settings.
- ✓ Prevention of people living in inpatient settings.
- ✓ Better quality of care and support for children, young people and adults with a learning disability and / or autism who display behaviours that challenge.

The Building the Right Support Programme will focus on:

Quality of Life – personalised care and support with a focus on people living in their own homes within the community.

Keeping people safe – positive risk taking whilst making sure that people are safe.

Choice and Control – changing from 'doing for people' to 'working with people'.

Support and Interventions – providing help in a way that does not stop someone achieving their goals.

Fair (Equitable) outcomes – making sure that everyone is treated the same.

There are nine main points for everyone to work towards:

1. I have a good and meaningful everyday life.

2. My care and support is person centred, planned, positive (proactive) and co-ordinated.

3. I have choice and control over how my health and care needs are met.

4. My family, paid support and care staff get the help they need to support me to live in the community.

5. I have a choice about where I live and who I live with.

6. I get good care and support from mainstream health services.

7. I can access specialist health and social care support in the community.

8. If I need it I get support to stay out of trouble.

9. If I am admitted to a hospital setting for assessment and treatment I get good care and do not stay there longer than I need to.
